

## Rigato

Roller recommended for the production of very large and thin tiles. Its unique geometry reduces the contact surface between the roller and the tile.

### Mineralogical composition

- Corundum
- Mullite
- Zirconia

### Type

Special Products

Al <sub>2</sub> O <sub>3</sub> content	70%
Bulk density	2.80 Kg/dm <sup>3</sup>
Apparent porosity	17.0%
Absorbed water	6.0%
M.O.E. 20°C	> 105 GPa
Thermal expansion 20-400°C	4.5*10 <sup>-6</sup> K <sup>-1</sup>
Thermal expansion 20-1000°C	5.5*10 <sup>-6</sup> K <sup>-1</sup>

### Typical use

- According to customer requirements
